ENERGY BILLS · WARM HOME DISCOUNT

£150 off the electricity bill — England, Scotland and Wales.

No money reaches your hand — your supplier takes £150 off the bill this winter. In Northern Ireland there is no scheme.

THE DAY THEY LOOK AT: 23 AUGUST 2026

£150

In England and Wales: you or your partner as notified to DWP were getting Universal Credit, Housing Benefit, income-related ESA or Pension Credit, and the electricity account was in one of those names.

> Automatic, by letter, and on the bill by 31 March 2027. Scotland has its own benefits list: automatic only for the core group, otherwise you apply to your supplier.

WHO DOES NOT GET IT

N. Ireland

Is the electricity account in neither your name nor your partner's? Then you do not get it. But if you hold the account you do qualify — even with no paper bill.

> Not the whole list: Northern Ireland, permanent care home residents, caravans. In Scotland some apply directly to their supplier.
