ENERGY BILLS · WARM HOME DISCOUNT

£150 off the electricity bill — England, Scotland and Wales.

No money reaches your hand — your supplier takes £150 off the bill this winter. In Northern Ireland there is no scheme.

THE DAY THEY LOOK AT: 23 AUGUST 2026

£150

On that day you or your partner were getting Universal Credit, Housing Benefit, income-related ESA or Pension Credit — and one of your names was on the electricity bill.

> In England and Wales it is automatic, by letter, and on the bill by 31 March 2027. Scotland has its own conditions.

WHO DOES NOT GET IT

N. Ireland

If your name is not on the electricity bill you do not get it — the common case is a rented room where the electricity is in the landlord's name. And in Northern Ireland the scheme does not exist at all.

> In Scotland it is not automatic for everyone — some have to apply directly to their supplier. And the supplier has to be in the scheme.
