EXPENSES · WORKING FROM HOME

Work done at home comes off your profit, from £10 a month.

Self-employed and doing the work at home? The flat rate stands in for the home's running costs — cleaning, heat and light, metered water.

THE AMOUNT, BY HOURS A MONTH

£26

25 to 50 hours in a month → **£10**. **51 to 100** hours → **£18**. **101** hours or more → **£26**.

> Example: 60 hours a month, all year — 12 × £18 = £216 off your profit. A month, or part of a month, carries the full band.

WHO CANNOT USE THE FLAT RATE

25h

Limited companies cannot use it, nor a partnership with a company as a partner. Under **25** hours in a month you take nothing for that month, but every other month is unaffected.

> It covers only the home's running costs. Rent, council tax, insurance, repairs, telephone and internet are claimed separately, at the business share.
