WINTER 2026/27 · COLD WEATHER PAYMENT

£25 for every week of freezing weather, paid automatically.

If you get one of a short list of benefits, meet that benefit's own conditions, and the temperature where you live sits at zero or below for seven days running, money goes into your account.

WHICH BENEFITS IT RUNS ON

4

Pension Credit, Universal Credit, income-related Employment and Support Allowance, or Support for Mortgage Interest. Each with its own further conditions.

> **£25** per 7 consecutive days at zero or below, recorded or forecast. Paid within 14 working days. Cold spells from 1 November 2026 to 31 March 2027, by postcode.

WHO DOES NOT GET IT

2 tests

On Universal Credit you do not get it if you or your partner are employed or gainfully self-employed. And not working alone is not enough — you also need limited capability for work, or a child under 5.

> A disabled child amount in the claim and you get it either way. Scotland has none of this — Winter Heating Payment instead.

WINTER 2026/27 · COLD WEATHER PAYMENT
